

TRAILPARTS™

Innovative Trailer Solutions

We do the business.

Quick Reference
Product Guide

ARE YOU SETTLING FOR MEDIOCRE SERVICE?

Customer service that could be described as mediocre, average or below par can be found everywhere. Think about it in context to your business, how do your current suppliers measure up?

TAKE THIS SIMPLE TEST

Ordering Cut Off Times

Have you ever called to place an order and been told, "Sorry, our order cut-off time is 3pm?"

Our team of sales team are ready for your calls
Mon-Fri: 8:00am - 5:00pm

Overnight Express Delivery

Do you ever call to place an order and hear, "Sorry, but you've missed our overnight delivery service now?"

Any courier orders placed before 4:30pm will be shipped that day.

Communication

Do you ever get automated phone messages when you call? Or your calls take for ever to be answered?

NO automated answer services. Our average call wait time is **5 seconds!**

Industry Knowledge

Do the people you get on the phone always have the knowledge and information you need?

With **25 years industry experience**, our designated support teams have extensive product knowledge.

Product Range

Do you have to call more than one supplier to get what you need?

We have all your high quality trailer requirements.
If we don't stock it, you don't need it.

Added Value

Does the product supplied add value to yours and give you a competitive edge or make you more profit?

Here at TrailParts,
"We do the business, so you can get on with yours"

MkII

Trailer Braking System
UP TO **3500kg**

NO ELECTRICS REQUIRED

**1 7/8" Coupling or
Autofit Coupling**
(1 7/8" and 50mm)

Locally Engineered for Local Conditions

- Easy multiple vehicle towing.
- No in-cab wiring required.
- Supports NZ products / industry.
- Unihub compatible.

Core Benefits of the Hygo MkII

- Two tier offering; Traditional hydraulic drum brakes, or high performance Patriot disc brakes.
- Same core 'off the shelf' components, available at a lower cost the EU spares.
- Locally compliant fully customised builds unlike EU imports, only available as finished products.
- Break-away function that applies the brakes in the event of a vehicle separation.
- Can auto-reverse, and has an effective parking brake.

IMPROVED | STRONGER | SAFER

INTRODUCING THE NEW V-SERIES

Sideways loads kill more jockey wheels than anything else! Nobody knows this better than trailer hire companies and users of heavy trailers, who suffer frequent jockey wheel breakages in this way. Based on feedback from some of the biggest trailer companies in Australia, Trailparts V-Series jockey wheels withstand sideways loads better, improving user safety and service life.

Heavy-Duty Handle & Screw

V-Series jockey wheels all use a 20% heavier duty winding screw than standard models. Atop that is a compact fold away heavy duty handle with a 16mm shaft.

Unique & Improved Swivel Mechanism

The new Trailparts V-series swivel bracket has a two-point engagement mechanism that resists sideways load. Further improvements are the swivel pin - which remains static in the bracket during swiveling (no more caught fingers) - and the short distance between the two parts of the swivel bracket (no more bent pins).

All-New High Load Alloy Wheel

A newly developed high-load alloy wheel is also released on these. The 190 x 75mm virgin rubber tyre is designed so that it won't slip on the rim under heavy load or skid on stones on the concrete; and the extra width means it is easier to push on soft and uneven surfaces.
