

MECHbrake

3500kg Mechanical Brake System

- Easy compliance
- Multi-vehicle towing
- No electrics or hydraulics
- Autofit multi-ball coupling

Introducing: Full mechanical braking system

This is what happens when New Zealand companies develop products specifically to benefit local industry – “best of” easy to comply EU brake systems, coupled with “best of” off the shelf New Zealand components.

NO ELECTRONICS, NO HYDRAULICS, 100% MECHANICAL

Why MECHbrake?

- Autofit coupling head to fit and self lock both ball sizes as standard.
- MECHbrake axles are assembled with UNIHUB mechanical drums ready to bolt in place. Take advantage of low maintenance axle components using sealed unitised bearings with a 100,000km / 3 year warranty.
- No electronics, no hydraulics, completely mechanical with easy servicing and brake adjustment.
- Use with standard NZ trailer wheels, no odd European offsets required.
- Uses wheel studs instead of wheel bolts. No more stripped thread
- Fully tested brake and coupling set to comply with NZ braking laws and ECER13 braking rule.
